The Board has identified the following thrust areas around which the Company shall be focusing its CSR initiatives and channelizing the resources on a sustained basis:

Interventions will include promoting preventive healthcare, building awareness about hygiene, sanitation, maternal & child health care, setting up medical infrastructure, instrumenting clean drinking water habits, etc.

As a responsible Company, we focus towards mitigating the effects of the crisis created by natural disasters, pandemic or likewise. We have partnered with the Government on various instances to provide support and aid. We have also worked with different partners for distribution of essentials among communities during the time of crisis.
- **Enhancing Vocational Skills:** In the area of Vocational training and skilling, we provide specialized and skill-based training to painters, carpenters, plumbers, etc., to enhance their skills, empower them, provide opportunities to secure better employment and improve their livelihood.

- **Water:** Water being a valuable and scarce resource that we share with our surrounding communities, we have identified water conservation and management as a key area of intervention. Our focus will be an integrated approach across (a) to (d) below:
 - (a) reducing overall specific water consumption;
 - (b) reuse/recycle wastewater back within the factories and communities in the vicinity of our manufacturing locations and other areas of operations;
 - (c) rain water harvesting in our factories and communities in the vicinity of our manufacturing locations and other areas of operations;
 - (d) watershed management and community outreach programs thus making more water available for the communities than what we consume every year.

The initiatives in this thrust area would, *inter alia*, include (i) creating capacities in conserving water through significant investments in partnership with relevant stakeholders, with the objective of water conservation, (ii) educating farmers in looking at various Government schemes with the objective of water management, (iii) undertaking water replenishment projects in the communities surrounding our factories. The approach would include providing support and infrastructure at each stage of water conservation, water preservation, water re-charge and waste-water treatment.

- **Education:** In education we aspire to contribute to improving and facilitating the literacy levels in various sections of the society, by providing support at every stage of a child's educational cycle including but not limited to developing infrastructure for schools/educational centers, conducting education programs on "how to lead to a healthy life", engaging with students and parents leading to development of a better community, livelihood enhancement projects, etc.
